

Location: Wichita, Kansas

Civil Engineer

Position Type: Full-Time Salary (Exempt)

Basic Function

As Civil Engineer, you will support the clients of Allied Environmental on our civil engineering design, environmental compliance, and permitting projects. The incumbent will have technical and professional responsibility for supervising, planning, scheduling, organizing, executing and coordinating assignments as necessary. You can anticipate evaluating and preparing civil design solutions for Solid Waste, Spill Containment, Storm Water Drainage, and Wastewater infrastructure and facilities. You will also apply your talents in resolving regulatory compliance and permitting issues under the Resource Conservation Recovery Act, and the Oil Pollution Act of 1990, where you can expect to prepare opinion letters, compliance plans, and permits. This opportunity is best suited to the Professional Engineer who can work independently as well as in a team.

This position leads to the unique opportunity for joint ownership in the company during the next two years. As such, we are seeking candidates that have an entrepreneurial spirit to add to that of the existing partnership. While Allied Environmental is a "small business" under the Federal classification scheme, we offer a wide array of environmental services and look for employees who can apply their skills over a number of different projects. We find that superior client service means understanding the relationships between the various regulations and how these relationships affect our clients' operations. Because of this, Allied Environmental enjoys clients who have used our services since our beginning in 1989. Additionally, we are always looking to the future for new business opportunities that may fit with our existing services, whether applied to new market sectors or new regions, and the successful candidate will possess this same vision.

Responsibilities

As our Civil Engineer, your focus will be client services and assisting their environmental business needs. The incumbent will interact with client representatives; provide technical guidance and technical presentations, support the on-going marketing efforts, including proposal preparation and making initial client contacts, and assisting in the overall corporate management efforts. The incumbent will provide mentoring and direction to our Engineers-in-training and will be responsible for stamping and sealing design documents. Travel dependent upon project requirements.

Minimum Qualifications:

1. Bachelors of Science Degree in Civil or Environmental Engineering.
2. Professional Engineer in Kansas and preferred one or more of Oklahoma, Nebraska, or Colorado.
3. Two (2) or more years of post-PE Design Experience in preparing project documents (Drawings and Specifications).
4. Demonstrated ability to write clearly and concisely and develop request for proposals from our clients.
5. Ability to perform mathematical computations relevant to civil engineering.
6. Demonstrated knowledge of project management including but not limited to scope of work development, project scheduling, budget, consultant contracting services, development of bid documents and construction administration.
7. Demonstrated ability to establish and maintain effective working relationships with management, co-workers, state and local officials, public and private groups.
8. Solid knowledge in and experience using AutoCAD Civil Design package.
9. Windows computing environment and Office software suite experience.

Compensation / Benefits

We offer competitive salaries, health/dental/life insurance benefits, qualified flextime, relocation assistance, and a retirement savings package.
