

Location: Wichita, Kansas

Civil / Environmental Engineer in Training (EIT)

Position Type: Full-Time Salary (Exempt)

Required Education: Bachelor's

Basic Function

As Civil / Environmental EIT, you will support the Allied Engineering Team with civil engineering design, environmental compliance, and permitting projects. The incumbent will have technical and professional responsibility for planning, organizing, executing, and coordinating assignments as necessary. You can anticipate evaluating and preparing civil design solutions for Solid Waste, Spill Containment, Storm Water Drainage, and Wastewater infrastructure and facilities working independently and in teams. You will also apply your talents in resolving regulatory compliance and permitting issues under the Resource Conservation Recovery Act, Clean Water Act, and the Oil Pollution Act of 1990, where you can expect to prepare opinion letters, compliance plans, and permits.

While Allied is a "small business" under the Federal classification scheme, we offer a wide array of environmental services and look for employees who can apply their skills over a number of different projects. We find that superior client service means understanding the relationships between the various regulations and how these relationships affect our clients' operations. Because of this, Allied enjoys clients who have used our services since our beginning in 1989. Additionally, we are always looking to the future for new business opportunities that may fit with our existing services, whether applied to new market sectors or new regions, and the successful candidate will possess this same vision. Allied requires all EIT's to become registered Professional Engineers once the requisite experience has been achieved. As such, Allied provides paid time off and leave to prepare for and take the PE exam.

Responsibilities

As a Civil / Environmental EIT, you will focus on supporting Allied's Engineering Team to provide services to clients and assist with their environmental business needs. The incumbent will interact with client representatives, perform site inspections, provide technical guidance and presentations, and support on-going marketing efforts of Allied.

Minimum Qualifications:

1. Bachelors of Science Degree in Civil or Environmental Engineering and passed the Fundamentals of Engineering exam (EIT Certification).
2. Ability to write clearly and concisely.
3. Ability to establish and maintain effective working relationships with management, co-workers, and public and private entities.
4. Knowledge in and experience using AutoCAD Civil Design package.
5. Windows computing environment and Office software suite experience.

Compensation / Benefits

We offer competitive salaries, health/dental/life insurance benefits, Simple IRA, Profit Sharing Bonus, qualified flextime, relocation assistance, and a retirement savings package.
